How to Establish Clinical Prediction Models

Usefulness of prediction models. Prediction models can be useful for several purposes, such as for inclusion criteria or covariate adjustment in a randomized controlled trial 24,25,26. In observational studies, a prediction model may be used for confounder adjustment or case-mix adjustment in comparing outcome between centers 27. We concentrate on the usefulness of a prediction model for medical practice, including public health (e.g. screening for disease) and patient care (diagnosing ...
