## Online Library Cod And Herring The Archaeology And History Of Medieval Sea Fishing

Cod and Herring explores both incremental and punctuated changes in marine fishing, providing a unique perspective on the rhythm of Europe's environmental, demographic, political and social history. The 21 chapters – by experts in their respective fields – cover a range of regions and methodological approaches, but come together to tell a coherent story of long-term change.

This interdisciplinary book combines history, archaeology and zooarchaeology to discover the chronology, causes and consequences of these fisheries.

Cod and Herring : The Archaeology and History of Medieval ...

We propose the concept of the "Fish Revolution" to demarcate the dramatic increase in North Atlantic fisheries after AD 1500, which led to a 15-fold increase of cod (*Gadus morhua*) catch volumes and likely a tripling of fish protein to the European market. We consider three key questions: (1) What were the environmental parameters of the Fish Revolution?
