Survey Research: A Case for Comparative Designs Bert Klandermans and Jackie Smith Survey research continues to be a frequently employed methodology in so-cial movement research. According to Crist and McCarthy (1996), one-fifth of the studies published in the 1980s and early 1990s used surveys as one of their data sources.

The Advantage of Comparative Research | Viget

The design of a research topic explains the type of research (experimental, survey, correlational, semi-experimental, review) and also its sub-type (experimental design, research problem, descriptive case-study). There are three main types of research design: Data collection, measurement, and analysis.

Seawright and Gerring (2008, p. 298) also discuss two further options for case selection which go back to the literature on comparative research designs (Berg-Schlosser and De Meur 2009 ...

COMPARATIVE RESEARCH - Brandon University

A causal-comparative design is a research design that seeks to find relationships between independent and dependent variables after an action or event has already occurred. The researcher's goal is to determine whether the independent variable affected the outcome, or dependent variable, by comparing two or more groups of individuals.

## Causal-Comparative Design - SAGE Research Methods

Most comparative studies carried out in this vein set out to examine various national development patterns in order to find similarities and differences among comparable societies. An influential work here is Cyril Black's *Dynamics of Modernisation* (1967), which quite ambitiously provides a paradigm for doing comparative research.

## The Comparative approach: theory and method

C.G. Knight, in *International Encyclopedia of the Social & Behavioral Sciences*, 2001. A comparative case study is a research approach to formulate or assess generalizations that extend across multiple cases. The nature of comparative case studies may be explored from the intersection of comparative and case study approaches. Case studies and qualitative comparative analyses share a common ...

## Potentials and Limitations of Comparative Method in Social ...

Comparative research is a research methodology in the social sciences that aims to make comparisons across different countries or cultures. A major problem in comparative research is that the data sets in different countries may define categories differently (for example by using different definitions of poverty) or may not use the same categories.

In any event, it is of crucial importance before engaging in QCA proper (through csQCA, mvQCA, fsQCA) to develop a specific comparative research design. Naturally, developing a research design covers many other aspects than simply case and variable selection—but we choose to concentrate on these two operations because they are particularly crucial in comparative research designs.
