Compiler Construction: Principles and Practice features a comprehensive, hands-on case study project for constructing an actual, working compiler. This case study involves a relatively simple programming language that will expose readers to the basic concepts used (and potential pitfalls) in constructing larger compilers.

Compiler Construction - Aalborg Universitet

compiler, we felt that emphasis on proofs could be misplaced. Many excellent theoretical texts already exist; our concern is reduction to practice. A compiler design is carried out in the context of a particular language/machine pair. Although the principles of compiler construction are largely independent of this context, the detailed ...
