Precalculus : Conic Sections - Varsity Tutors
The following diagram shows how to derive the equation of circle (x - h) 2 + (y - k) 2 = r 2 using Pythagorean Theorem and distance formula. Scroll down the page for examples and solutions. Circle Conic Section When working with circle conic sections, we can derive the equation of a circle by using coordinates and the distance formula.

lps.lexingtonma.org
The form most often used for circles is the following general equation: where (h, k) are the coordinates of the center and r is the radius. We are given the coordinates of the center as (4, -5), so h is 4 and k is -5. We still need to find the radius. We can do this by plugging in the second given ...
