GitHub - csound/csound: Main repository for Csound

Csound is a Domain-specific computer programming language for audio programming. It is called Csound because it is written in C, as opposed to some of its predecessors. It is free software, available under the LGPL.

Sound and Music:: La tua musica su internet

SoundCloud is a music and podcast streaming platform that lets you listen to millions of songs from around the world, or upload your own. Start listening now!

Opportunities | Sound and Music

Csound works in more or less the same way, only its object code is a stream of numbers representing audio. In order for us to hear that audio we must play it back through a Digital to Analogue Converter. The DAC converts each of the sequenced numbers to a voltage that causes our speakers to move and vibrate, thus creating sound.
