What Is Dark-Side Personality? Dark-side personality refers to how most people behave when reacting to stressful situations. Most people will occasionally exhibit extreme (or dark-side) behavior, usually in response to pressure. This behavior can have a very negative impact on work performance, social interactions, and overall well-being.

Hogan | The Dark Side

The Dark Side of Personality The Hogan Development Survey (HDS) describes the dark side of personality – qualities that emerge in times of increased strain and can disrupt relationships, damage reputations, and derail peoples' chances of success.

Dark Side Pcl

Within teams that work in a confined physical or psychological space, 'dark side' characteristics will upset team dynamics, add to stress and adversely affect performance. An appreciation of the stress reactions of other team members will help to reduce the impact of disruptive 'dark side' tendencies.

Delving into the Dark Side of Personality

The PCL plays a secondary role in resisting side to side and rotational movements, or over-straightening (hyperextension) of the knee. Therefore, any forceful sideways, rotational or hyperextension movements can injure the PCL but this is unlikely to occur without additional injury to another major knee ligament.
