Managers. Everyone in this process should have at least a high-level understanding of this whole process. That's the only way to build an efficient data team and turn your raw data into meaningful, useful and successful decisions!

Why Data Science Teams Need Generalists, Not Specialists
Whilst data science has many grey edges, it's probably worth including some fairly dry definitions of two common teams – 'Big data analytics' teams and 'data product' teams. The former looks for predictive patterns in data without necessarily having a preconceived notion of what they are looking for, and the latter works to implement automated systems that are data-driven.
