O&G maintenance, construction and modifications ... Changes made during the conceptual phase are part of the natural process. The detailed design phase only starts once all concepts are approved and checked from safety and economic perspectives. During detailed design, change is sometimes required due to the late discovery of impractical construction of for cost reasons.

How should design changes and modifications be managed?

Design for Maintainability (DfM) is the first step of an effective maintenance program, linking maintenance goals to the design process. Design for Maintainability emphasizes the importance of timely integration of design and construction knowledge with operations and maintenance (O&M) experiences into project designs at an early stage.
