Developing Service-Oriented Applications

Wikipedia

Service-oriented applications A service-oriented application is an application that is composed largely of services, which are often in a hierarchy. The topmost level contains one or more integration services, each of which controls a flow of activities, such as processing

In the field of software
application

development, service-
oriented development
of applications (or
SODA) is a way of

Online Library
Developing
Service Oriented
producing service-
oriented architecture
applications. Use of
the term SODA was
first used by the
Gartner research firm.
SODA represents one
possible activity for
company to engage in
when making the
transition to service-
oriented architecture
(SOA). However, it
has been argued that
