DIN 15018-3 - European Standards

This standard is included in DIN Handbook 44 and 59. Applicable to steel structures of rail less cranes on vehicles with stress collectives equal to or lighter than S1, a limiting stress ratio σ not less than -0,25 and notch cases equal to or better than K3 in accordance with DASt-Richtlinie (DASt Guideline) 011.

supporting structures.

DIN 15018-2 : Cranes; steel structures; principles of ...

For the fatigue resistance the DIN 15018 uses weld or notch groups where W0-W2 are classes for unwelded material and K0-K4 are for welded designs). The table 17 of the DIN 15018 shows the influence of the material type, the crane group and the notch group on the maximum allowable stress amplitude for pure dynamic loads (minimum stress = - maximum stress and stress ratio = -1)
