Dr.Riemann's Zeros by Karl Sabbagh - Goodreads

Can someone explain zeros and zeta function for Riemann ...

Riemann knew that the non-trivial zeros of the zeta function were symmetrically distributed about the line $s = 1/2 + it$, and he knew that all of its non-trivial zeros must lie in the range $0 \leq \text{Re}(s) \leq 1$. He checked that a few of the zeros lay on the critical line with real part $1/2$ and suggested that they all do; this is the Riemann hypothesis.
