Study Guides for Psychology Students - Simply Psychology  
a strong impact on both psychology and education. Like early works by Watson (1924), Skinner rejected the idea that the purpose of psychology was to study consciousness, rather the goal was to predict and control observable behavior. Learners were seen as coming to learning situations tabula rasa, subject to conditioning by their environment.

Principles of Learning Theories: Simple and Complex Learning  
In society, children are surrounded by many influential models, such as parents within the family, characters on children ' s TV, friends within their peer group and teachers at school. These models provide examples of behavior to observe and imitate, e.g., masculine and feminine, pro and anti-social, etc.

Albert Bandura | Social Learning Theory | Simply Psychology  
We are biologically " wired " so that a certain stimulus will produce a specific response. One of the more common examples of classical conditioning in the educational environment is in situations where students exhibit irrational fears and anxieties like fear of failure, fear of public speaking and general school phobia.
