EMD 645 explained

The EMD 645 family of diesel engines were designed and manufactured by the Electro-Motive Division of General Motors. While the 645 series was intended primarily for locomotive, marine and stationary engine use, one 16-cylinder version powered the 33-19 "Titan" prototype haul truck designed by GM's Terex division.

EMD 645 - Wikipedia

The 645 engine was intended to further push horsepower output as trains were becoming larger and heavier. However, while EMD normally went its own way during that era the need for a more powerful prime mover may have also been spurred by the competition. In 1963 Alco released the 2,800 horsepower, six-axle C628.
