Car model - Wikipedia

Automobile, a usually four-wheeled vehicle designed primarily for passenger transportation and commonly propelled by an internal-combustion engine using a volatile fuel. The modern automobile is a complex technical system employing subsystems with specific design functions. Some of these consist of

Automobile - Encyclopedia Britannica

If you're involved in a car accident, chances are you'll end up making some kind of claim for injury or vehicle damage (maybe both). That claim can get resolved in a number of ways, usually by a settlement that you receive from the at-fault driver's car insurance carrier. But some accidents involve claims made through your own insurance coverage, especially if you live in a "no-fault" state.

World's Largest Automobile Encyclopedia - All Car Index

A car is a road vehicle used to carry passengers (people). Cars usually have four wheels (round things which turn in order to lead to movement), and an engine or motor to make them move. Many cars were made during the 20th century
