Diesel Engine Control Systems for Caterpillar® engines listed on the cover of this section. Additional engine systems, components and dynamics are addressed in other sections of this Application and Installation Guide. Engine-specific information and data are available from a variety of sources.

DIESEL ENGINE CONTROL SYSTEMS

Vehicle Interface Module . This module located under the dash is the main interface between the engine and transmission controls. It houses the relays for the neutral start, high idle and exhaust brake systems. The Transmission ECU sends a signal when it is in neutral so the engine can safely go into high idle controlled by the operator.
