BHJ Products Nissan Torque Honing Plate - 3.0L VG30 SOHC V6 13 Bolt. Head-bolt torque can dramatically distort cylinders and cylinders can not be bored or honed accurately if cylinder dimensions change so significantly after assembly. Rings won't seal well and scuffing is likely to occur if the engine overheats.

Nissan VG30E and KA24E engine factory workshop and repair ...
swap it for a VG30ET, it's the best bang for the buck aside fomr nitrous, if you're bent on keeping it n/a, the intake exhaust ecu are the common upgrades, if you add a lightweight flywheel, crmak pulley, cam geats I've heard of the n/a's getting 160whp, keep in mind they were only rated 160 hp at the crank. or you could send your engine to sunbelt or robello and spend \$5-10k and get as much ...

Used Nissan pickup trucks in Colorado Springs, CO for Sale
I bet the cams in the Villager/Quest VG30E changed. From what I can find the bore' date+' stroke, and compression ratio are all the same however... it is non-interference. From what I hear, Ford basically told Nissan to make it non-interference for the van. This explains why the overall specs of the engine are the same except for power output:

I am looking for all the torque wrench settings on a vg33 ...

The Nissan VG30ET is turbocharged a 3.0 l (2,960 cc, 180.62 cu.in.) V6 60° straight-four, four-stroke cycle gasoline engine from Nissan VG-family. The VG30ET features cast-iron block and two aluminum heads with single overhead camshafts (SOHC) and two valves per cylinder.

Improving the VG30E - Nissan V6 Forum - HybridZ
Yeah, Nissan didn't think the pulley out to well when they designed it for the Pathfinders and I haven't figured out why they changed it. Engines like the one in my 4/87 Z31 which is a VG30, uses a single 27MM bolt to hold the crank pulley on without the 6 smaller bolts that separate it into pieces.

Nissan V6 with VG30 Engine
The engine specified as the VG30ET engine in the Nissan GTP ZX-Turbo Racecar, was a heavily modified VG30ET producing over 478 kW (641 hp) at 8,000 rpm, and over 686 N⋅m (506 lb⋅ft) at 5,500 rpm. Applications: 1984–1989 Nissan 300ZX Turbo (Z31) Nissan Leopard; Nissan Gloria/Nissan Cedric 230 PS (169 kW)

Nissan VG engine - Wikipedia
what's really cool is they're actually a very light engine for a iron/aluminum V6. i believe the early vg30et's weighed right under 400 lbs dry (i believe around 396 lbs.) when the Z31 first came out i believe nissan boasted that the VG30E(T) was the lightest V6 to ever be produced at that time.
