Science Fiction Compact Edition Stories And Contexts

Construction dewatering is often required to control groundwater when excavations are made in Chalk, which is a relatively soft fissured limestone. The rate of groundwater inflow and any associated instability in an excavation are controlled by the hydrogeological setting degree of weathering of the chalk.

PUB C574 Engineering in chalk, CIRIA - Publication Index | NBS

It explains recommended schemes for the engineering description and classification of chalk, building on the work presented in CIRIA PF "Foundations in Chalk". The publication looks at the mechanical and material properties of intact, in-situ and compacted chalk and considers their implications for the design and construction of earthworks, cuttings, retaining walls and anchorages.

Engineering in chalk (C574) - Advanced Technovation Ltd

The CIRIA Project Report 11 'Foundations in Chalk' introduced a new chalk classification scheme. For structured chalk the grade is defined by a combination of fracture spacing and aperture, supplemented by an assessment of density. For structureless chalk the grade is based on the proportion of comminuted chalk matrix to coarser fragments.
