5 Easy Ways to Measure the ROI of Training

The eLearning ROI formula looks like this: A positive ROI means that the training has paid off, and a negative ROI indicates losses. Example 1: The Beta company has invested \$65,000 in employee training. As a result, they managed to increase sales and earned \$175,000. $ROI = (175,000 - 65,000)/65,000 * 100 = 169\%$.

Evaluating Training Effectiveness And ROI - eLearning Industry

Phillips and Phillips built on the Kirkpatrick model by adding return on investment (ROI) as a fifth level. However, much ROI evaluating is carried out post project and does not build from a baseline. Another problem is that the arithmetic of ROI means that when a small cost learning intervention is set against a big project cost, it can look superficially impressive.

Evaluating the ROI from learning: how to develop value ...

One of the most frequently quoted aspects of Phillips' model is the addition of a fifth level of evaluation to Kirkpatrick's Learning Evaluation Model, which is return on investment (ROI). Phillip ' s model states that after determining a learning program ' s business impact at Kirkpatrick ' s Level 4, you can translate that impact into monetary terms and compare it to the total cost of the ...
