Specifying a Language for the TEXT Function (Microsoft Excel)
In Excel, a function is a predefined formula that performs a specific calculation by using values a user input as arguments. Every Excel function has a specific purpose, in simple words, it calculates a specific value. Each function has its arguments (the value one needs to input) to get the result value in the cell.

MS EXCEL - apcce.gov.in
It is useful to know how to save only the calculated value of a function or formula – that is, the function or formula that produced the value is removed. For instance, when you save an Excel file as a delimited text file (eg, .txt or .csv) all values calculated by a function or formula are replaced with Os.
