### Extinction Horizon The Cycle 1

The Permian–Triassic (P-T, P-Tr) extinction event, also known as the End-Permian Extinction and colloquially as the Great Dying, formed the boundary between the Permian and Triassic geologic periods, as well as between the Paleozoic and Mesozoic eras, approximately 251.9 million years ago. It is the Earth's most severe known extinction event, with the extinction of 57% of biological families ...

For the sniper rifle in Mass Effect, see Elkoss Combine. The Reapers are a highly-advanced machine race of synthetic-organic starships. The Reapers reside in dark space: the vast, mostly starless regions between galaxies. They hibernate there, dormant for fifty thousand years at a time, before returning to the galaxy. These giant machines are ancient; their true name is unknown. "Reapers" was a name given to them by the galaxy's inhabitants.

Both the Chicxulub and Boltysh impact events are associated with the K-Pg boundary. While Chicxulub is firmly linked to the end-Cretaceous mass extinction, the temporal relationship of the ~24 Ma Boltysh impact to these events is uncertain, although it is thought to have occurred 2 to 5 ka before the mass extinction. Here, we conduct the first direct geochronological comparison of ...

### The Boltysh impact structure: An early Danian impact event ...

In Star Wars, the Galactic Republic is in decline at the start of the Episode I, but Emperor Palpatine, rather than squandering it, restores it to expansion, but at the cost of turning it into, well, The Empire. In Episode IV, it is at the end of the stabilization phase. As Leia had predicted, the decline of his empire is rapid: "The more you tighten your grip, Tarkin, the more star systems will ...
