Which Linux version would be the best for a first time user.

This would be a waste of time and cause the report to be wrong, because the people left in 2010 and so shouldn't have Annual Assessments in 2011 and 2012. SOLUTION: be sure to use the EXIT Wizard in the left - hand menu first: This will ensure that you do the fewest possible Annual Assessments, saving you time.

First Time Linux User Guide

Trying Linux for the First Time: A Beginner's Guide. You're probably familiar with Windows and/or Mac OS. But they aren't the only operating systems available. A popular alternative is Linux. In this article, Lesley Lutomski introduces Linux and what you need to know to give it a try.

10 Tips For First Time Linux Users - LinuxAndUbuntu

When you for the first time boot the ubuntu system, what you see is a boot flash screen which is called a USplash and it covers up what happens in the background when linux is booting. This screen is introduced so that the users who aren't interested in what actually happens in the background, don't really see it. First Login Screen: On the right side of the login screen, you will notice the name of the computer, the current user, and the password field.
