According to a postulate of quantum mechanics, $W(F)$ is the average value of a great many energy measurements on the system prepared in the state F . Variation Theorem. Theorem: If H is a self-adjoint (Hermitian) operator with a purely discrete spectrum and if E_0 is its smallest eigenvalue, then the minimum value of $W(F)$ is E_0 .

Elementary Quantum Chemistry by Frank L Pilar - AbeBooks

As the author notes in the Preface to this valuable text, experimental chemists have moved past studying the average behavior of atoms or molecules "to probe the step-by-step behavior of individual atoms and molecules as they collide, form 'transition states,' and ultimately form products." In such experiments, quantum mechanical computations do two useful tasks: They fill in the observational ...
