Folding (DSP implementation) - Wikipedia
Folding in Architecture, edited by Greg Lynn and first published as an issue of Architectural Design in 1993, is already a classic. A catalyst for the wave of change that was already in the air at the beginning of the decade, it anticipated and ushered in many distinctive features of architecture in the first digital age.

161 Best Folding Architecture images | Folding ...
Photo: Ake Lindman Architects love origami because it achieves what buildings rarely do: frame space through extreme economy of means. Origami artists can produce a panoply of shapes and forms using only a single sheet of paper. Their constructions are inherently structural and can even be engineered to bend, contract, and expand—things that buildings can't do either.…

Folding Architecture: Top 10 Origami-Inspired Buildings ...
ing, defined folding as a 'strategy for disiocating vision.'" In 1993, Lynn's prefatory essay to Folding in Architecture elo quently argued for continuities of all types: visual, programmatic, formal, technical, environmental, socio-political and symbolic. The list of suitabie means to this end is also remarkably diverse:

90+ FOLDING ARCHITECTURE ideas | architecture, folding ...
In recent years, folding techniques are widely used by many architects to make 3D forms from 2D sheets as an inspiration for their design, which enables simpler and more intuitive solutions for architectural realization. This research provides an overview of using folding techniques in architecture design, with an emphasis on their new applications.

(PDF) An Overview of Folding Techniques in Architecture Design
Folding is a transformation technique using in DSP architecture implementation for minimizing the number of functional blocks in synthesizing DSP architecture. Folding was first developed by Keshab K. Parhi and his students in 1992. Its concept is contrary to unfolding.Folding transforms an operation from a unit-time processing to N unit-times processing where N is called folding factor.

Folding in Architecture by Greg Lynn - Goodreads
The key to operating this architecture at high speeds is the folding stage. N. E. Chasek of Bell Telephone Labs describes a circuit for generating the folding transfer function using nested diode

bridges in a patent filed in 1960 (Reference 3). This circuit made use of solid-state devices, but
