### **Fractions, Decimals, Percents**

90% of the time, fractions will be easier to perform arithmetic. Decimals are sometimes more useful when comparing numbers relative to one another, such as in a number line, but these questions are the exception. Even if given a decimal (or percent) looks easy, quickly convert to a fraction.

### **GMAT Fractions, Decimals, & Percents (Manhattan Prep GMAT ...**

To convert decimals into percents, simply move the decimal point two places to the right. So 0.4 becomes 40% and 0.654 becomes 65.4%. To convert fractions into percents, multiply the numerator and denominator of the fraction by the same number.

Another method for converting fractions to decimals is to manipulate the fraction so that the denominator is 10 or 100 (or any power of 10). After all, percents are fractions of 100. Here are a few simple examples: Convert  $\frac{1}{2}$  to a decimal by manipulating the denominator to a power of 10.
