54 is a vehicle speed sensor fault. Could be a bad sensor,
but more likely a wiring issue. Your engine has gone into
anti-tamper mode because it's not getting a speed signal.

Bulkhead Module Fault Code Information 54-177

Freightliner codes are obtained through diesel engine parts sites, such as DieselServiceParts.com. The site provides a long listing of codes that enable truckers and mechanics to diagnose a specific engine problem. The engine control module, or ECM, constantly tracks voltage signals and records codes when values do not meet with the standard ...

DDCSN Sundown - Freightliner Trucks

One of the things that can trip a 54 code is poor fuel pressure/lack of fuel to the injectors. They spray a poor atomization and this makes the engine perform poorly for a few milliseconds and this upsets the pulses from the speed sensor.
