underwater through gills. As the tadpole gets older, it loses its fishy tail and its gills and grows legs and develops lungs. The tadpole has become a frog.

From Tadpole to Frog... book by Wendy Pfeffer

The length of time a tadpole takes to develop really depends on what kind of frog it came from! I've even heard that some tadpoles can remain in their tadpole stage as long as 8 months, while others only take 6 to 9 weeks! When the tadpoles start getting close to developing legs, they will need some sort of perch so they can get out of the water.

From Tadpole to Frog: Pfeffer, Wendy, Keller, Holly ...

Changing from Tadpole to Froglet to Frog. Expect the change from tadpole to frog to take approximately 12-16 weeks. This change is called 'metamorphosis.' First, back legs will emerge from the tadpole. Gradually the tadpole will develop lungs and you'll see some changes to the tadpole's head like elevated eyes and a wider mouth.
