FX options can be used to create bespoke solutions and work to remove the upfront cost of a premium – this involves certain caveats around the structure of the option product. Basic terminology for FX Options Premium – The upfront cost of purchasing a currency exchange option.

An Introduction to Structured Products

The FX options industry has correspondingly shown great innovation in this class of products and in the models that are used to value and risk-manage them. FX structured products commonly include barrier features, and in order to analyse the effects that these features have on the overall structured product, it is essential first to understand how individual barrier options work and behave. FX Barrier Options takes a quantitative approach to barrier options in FX environments.
