The study of interchangeability of liquefied natural gas ...

At present, there is still no systematic study on the interchangeability of natural gas in China and the national regulations mainly relying on the European and American methods. Abundant experiments have verified the AGA (American Gas Association) index is hardly to guarantee a totally valid prediction for gas interchangeability in China . .

Gas interchangeability criteria emerged in the early days of the natural gas industry as a means of avoiding end use combustion problems before they occurred in widespread fashion in the field. Specific statements of the need for gas interchangeability criteria are rare in the early industry literature, probably
