Genetics: The Science of Heredity (Key Terms) Meiosis The process that occurs in the formation of sex cells (sperm and egg) by which the number of chromosomes is reduced by half. Messenger RNA RNA that copies the coded message from DNA in the nucleus and carries the message into the cytoplasm.

Genetics - Wikipedia

- Mendel's work has become the basis of genetics, the study of heredity. Mendel's Pea Experiments.
- Mendel chose pea plants because their traits were easy to see and distinguish.
- He crossed plants with two different traits, for example purple flowers with white flowers.

Pearson- Genetics: The Science of Heredity Flashcards ...

Genetics: The Science of Heredity. The phenotype of an organism is its physical appearance, like what you see when you observe it. The genotype is the genetic makeup, or what's inside. It is also the allele combination of a trait. If a person is brown eyed, then brown is the phenotype for the color of there eyes. Their genotype is either Bb or BB.
