Geometric dimensioning and tolerancing (GD&T) is a system for defining and communicating engineering tolerances. It uses a symbolic language on engineering drawings and computer-generated three-dimensional solid models that explicitly describe nominal geometry and its allowable variation.

Geometric dimensioning and tolerancing - Wikipedia

Dimensioning Geometrics is the science of specifying and tolerancing the shapes and locations of features on objects. Once the shape of a part is defined with an orthographic drawings, the size information is added also in the form of dimensions. Dimensioning a drawing also identifies the tolerance (or accuracy) required for each dimension.

Fundamentals of Geometric Dimensioning & Tolerancing (GD&T)

GEOMETRIC DIMENSIONING AND TOLERANCING In order to properly plan the processes to make a part, you must first understand the part designer's intention. Geometric dimensioning and tolerancing is a method by which designers specify the geometric form of parts. The definitions and convention used in this course are based on ISO standard.
