Specification (technical standard) - Wikipedia

What are Engineering Specifications? Specifications are quantitative, measurable criteria that the product is designed to satisfy. In order to be measurable and unambiguous, specifications must contain a metric, target value and engineering units for the target value. Metric – The metric is the characteristic of the product that will be measured.

MASTER CONSTRUCTION SPECIFICATIONS (PG-18-1) - Office of ...

A specification often refers to a set of documented requirements to be satisfied by a material, design, product, or service. A specification is often a type of technical standard.. There are different types of technical or engineering specifications (specs), and the term is used differently in different technical contexts.

Building and Construction CSI Specifications | ARCAT  
The Unified Facilities Guide Specifications (UFGS) are published only in electronic format and are intended to be used with SpecsIntact software. The UFGS Master uses the latest CSI MasterFormat, therefore, as of January 2012, the UFGS Working Group decided to discontinue support of MasterFormat 1995.

ASTM - Valve Standards - Engineering ToolBox

□ Engineering specifications serve several functions: – Specify how a design shall be implemented. – Clarify agreements on design goals and methods. – Tutorial for new members of an engineering team. – Starting point for other documents (patent applications, presentations, technical
