2003. A. Probably the easiest thing for you to do is to change the current hexavalent chromate conversion coating to a trivalent version. The trivalent chromates do not exactly reproduce the same colors as the hexavalent chromates, but they are capable of providing 48 hours of salt spray resistance before white rust.

Gmw3044 Full Product
Zinc-plated parts or their corrosion products must not come in contact with stressed polyamides 6 or 66. Zinc-plating types without supplementary treatment are also used as a basecoat for an additional paint. This coating must be so applied that no negative influence in appearance and adhesion appears (e.g., blistering by effusion of hydrogen).
