Hydroponic Systems 101 | Learn The Basics of Hydroponics

Hydroponics is a subset of hydroculture, which is a method of growing plants without soil, by instead using mineral nutrient solutions in a water solvent. Terrestrial plants may be grown with only their roots exposed to the nutritious liquid, or the roots may be physically supported by an inert medium such as perlite, gravel, or other substrates. Despite inert media, roots can cause changes of ...

General Hydroponics

Hydroponics definition is an innovative method to grow plants without the use of soil. Instead of soil, a hydroponics system uses an oxygenated and nutrient-rich solution. This makes the uptake process of nutrients by plants more efficient and effective as compared to the conventional way using soil.

Cannabis Growing - Hydroponics V. Soil Overview

Aeroponics is the process of growing plants in an air or mist environment without the use of soil or an aggregate medium. The word "aeroponic" is derived from the Greek meanings of aer (, "air") and ponos (, "labour"). Aeroponic culture differs from both conventional hydroponics, aquaponics, and in-vitro (plant tissue culture) growing.
