Mineral Nutrition in Plants:  
Charles All 2010 Hardcover  
The process involving the  
absorption, distribution and  
utilization of mineral  
substances by the plants for  
their growth and development  
is called mineral nutrition.  
Since these mineral elements  
enter the biosphere mainly  
through the root system of  
plants, the plants, in a  
way, act as the "miners of  
earth crust".

In most natural soils, the  
availability of mineral  
nutrients limits plant  
growth and primary  
productivity. Nutrient  
limitation is an important  
selective pressure and  
plants face many special  
changes related to the need  
to acquire and use mineral  
nutrients efficiently.
