The primary charge output current is rated at 12 volts: Freedom 10 50 amps DC Freedom 15 75 amps DC Freedom 20 100 amps DC Freedom 25 130 amps DC Freedom 30 140 amps DC. They are designed to rapidly and optimally charge wet cell, gel cell, or Absorbed Glass Mat (AGM)\*\* deep-cycle batteries.

### **Heart Interface inverter problems. - JustAnswer**

The only breaker is on the panel itself. I finally traced my problem down to the inverter/charger. Once I connected the incoming and outgoing AC directly, eliminating the inverter/charger from the loop, everything on circuit A is working and the meter is showing 120 volts. This means that something is blown on the Freedom 2000 unit.

I've got a Freedom 20 Inverter/Battery Charger, and a heart interface link 2000 remote. Would have been made around the mid-90s. Have been able to use the Xantrex Link 2000 manual for some things, but not for others (for example, there's no FUNC button so I can't double-check battery type, but can set voltage and battery capacity).

### **Owners Guide & Troubleshooting**

The Freedom 20 has a problem with the inside circuit boards coming loose. Heart/Xantrex uses small wire ties inside to "hold" the board connections together. That is why 4 years ago when the tech banged the side it started working. Disconnect the battery cables and all other connections and take the case off the unit.
