Heating Oil vs. Natural Gas | Petro Home Service

A faulty gas heater can cause serious health problems. Health problems that seem to be worse or only occur when the heating is on may be caused by carbon monoxide (CO) from a faulty gas heater.

Where To Download Heat Effects In Gas Systems Simone

Carbon monoxide is colourless and odourless. High levels of carbon monoxide in the air are very dangerous and may cause people to pass out or even die.

Why Natural Gas and Propane are MAJOR HEALTH RISKS - Eat ...

Most homes throughout the UK are heated by gas – whether it is from the grid or supplied by a tank. This is a fuel that causes a lot of pollution from both production of heat and the way gas systems heat

Where To Download Heat Effects In Gas Systems Simone

the home. Did you know that gas central heating loses around 25% heat as the produced heat is transferred from radiator to radiator throughout the home? This means that more heat (meaning more fuel and pollution) is required to warm each room in the house.
