A sinusoidal alternating current can be represented by the equation $i = I \sin \omega t$, where i is the current at time t and I the maximum current. In a similar way we can write for a sinusoidal alternating voltage $v = V \sin \omega t$, where v is the voltage at time t and V the maximum voltage. Thus we can think of an alternating current and voltage in terms of a model in which the instantaneous value of ...

Neither will engineering software packages replace the traditional engineering education. They will simply cause a shift in emphasis in the courses from mathematics to physics. That is, more time will be spent in the classroom discussing the physical aspects of the problems in greater detail, and less time on the mechanics of solution procedures.
