**Active Reading Workbook - Mrs.  
Graves Science**

**Holt Environmental Science This textbook, by Karen Arms, is designed for the low-level reader, or early grade level students taking environmental science. Most of the prominent topics are covered, but only at a very basic level to give the students an understanding of the very essentials.**

However, the book is written on a very basic level, and only provides a very superficial coverage to current environmental science topics. I would not recommend this textbook for upper-level high school students. For teachers, this textbook also includes a resource CD with Powerpoints, tests, quizzes, and other worksheets.
