Leonhard Euler and The Basel Problem
A talk given by William Dunham, Professor of Mathematics at Muhlenberg College.

How Euler Did It | Mathematical Association of America
Euler spends the rest of these two chapters doing applications of Bernoulli numbers, including calculating the Euler-Mascheroni constant, γ , to 15 decimal places. All this is rather unexpected in a textbook on differential calculus. With this, Euler did not write again on Bernoulli numbers until 1768. In fact, in the intervening

Leonhard Euler - Wikipedia
Despite a long life and thirteen children, Euler had more than his fair share of tragedies and deaths, and even his blindness later in life did not slow his prodigious output - his collected works comprise nearly 900 books and, in the year 1775, he is said to have produced on average one mathematical paper every week - as he compensated for it ...
