### Understand Vortex Indicator Trading Strategies

The Vortex Indicator is an oscillator that is used to determine the beginning of a new trend and to confirm an ongoing trend, its direction and strength. The indicator consists of two lines that capture positive and negative trend movements: the uptrend line (VI+) and the downtrend line (VI-).

### How to set up and use in trading the Vortex Indicator

The Vortex Indicator (VTX) can be used to identify the start of a trend and subsequently affirm trend direction. First, a simple cross of the two oscillators can be used to signal the start of a trend. After this crossover, the trend is up when +VI is above -VI and down when -VI is greater than +VI.

### How To Use Vortex Indicator

The vortex indicator plots two oscillating lines: one to identify positive trend movement and the other to identify negative price movement. Crosses between the lines trigger buy and sell signals that are designed to capture the most dynamic trending action, higher or lower.
