In the past month, I've installed IBM Systems Director version 6.3 twice and thought I'd share some of what I learned. Systems Director V6.3 is very different from previous versions: It's far simpler to install but the key challenge is finding clear, step-by-step documentation on what to do.

Ibm System Director Installation Guide

If your firewall application asks you to allow the install application to run, you must allow it to run. Then Java will display a "Do you want to run this application?" dialog. Verify that the publisher is IBM and the location shown is an IBM URL, then select "Run" to allow the installer to continue.
