Frilled sharks were alive during the Cretaceous period which started around 145 million years ago, and can still be found today. The frilled shark has 300 razor sharp teeth, and it can grow to two metres in length. Because of its snake-like appearance it has often been mistaken for mythical sea serpents.

What if dinosaurs were alive in today's world - Answers

It's entirely feasible that if that catastrophe hadn't occurred, dinosaurs would still be alive today, and we mammals would still be small, burrowing creatures, quaking in fear of the terrible lizards that stalked our land.
