I Intrahousehold Resource Allocation
Many key development outcomes depend on women's ability to negotiate favorable intrahousehold allocations of resources. Yet it has been difficult to clearly identify which policies can increase women's bargaining power and result in better outcomes.

Intrahousehold resource allocation in developing countries ...
One of the central messages from research on gender is that many key development outcomes seem to depend on women's ability to negotiate favorable intrahousehold allocations of resources. The development literature suggests that women's bargaining power within households is linked to variables such as the health and education of children and the general well-being of women and girls.

Intrahousehold Bargaining and Resource Allocation in ...
Intrahousehold Bargaining and Resource Allocation in Developing Countries. Policy makers and development practitioners intuitively expect that women's bargaining power will affect key development outcomes, such as the health and education of children and the wellbeing of the women themselves.
