*Water Resources Engineering focuses on the use and management of land and water resources in rural and urban watersheds. Definition: Irrigation is the controlled application of water to croplands. Its primary objective is to create an optimal soil moisture regime for maximizing crop production and quality while at the same time minimizing the environmental degradation inherent in irrigation of agricultural lands.*

*Irrigation and Water Power Engineering by B.C. Punmia  
This book is a good book for civil and irrigation engineers. For  
agricultural engineers it will act as a reference book and will  
help to execute the water power to the real life problems.  
Water power has a great influence over the Indian sub-  
continent as a lot of rivers flowing over the India.*
