Each of the preceding buzzwords is explained in The Java Language Environment, a white paper written by James Gosling and Henry McGilton. In the Java programming language, all source code is first written in plain text files ending with the .java extension. Those source files are then compiled into .class files by the javac compiler. A .class file does not contain code that is native to your ...

Original sin is the Christian doctrine that humans inherit a tainted nature and a proclivity to sin through the fact of birth. Theologians have characterized this condition in many ways, seeing it as ranging from something as insignificant as a slight deficiency, or a tendency toward sin yet without collective guilt, referred to as a "sin nature", to total depravity or automatic guilt of all ...
