A regular expression (shortened as regex or regexp; also referred to as rational expression) is a sequence of characters that define a search pattern. Usually such patterns are used by string-searching algorithms for "find" or "find and replace" operations on strings, or for input validation. It is a technique developed in theoretical computer science and formal language theory.

### It Started With No Strings

Despite the no strings beginning, it's mostly a rather sweet romance with a satisfying conclusion. I really wasn't sure about the constant trauma of the hero and heroine or the constant trauma at the hospital - which for some reason for me came across as quite incongruous.
