Java 7 was a significant upgrade to the Java model which accommodates some major upgrades to the programming language including language enhancements, multiple exceptions handling, JVM support for dynamically-typed languages, and more. Java SE 8 is a revolutionary release of the programming language which took the model to a whole new level.

Difference between Java 7 and Java 8 | Difference Between

Java is a good language for introducing object orientation. Its object model is better organized than C++. In C++ it is easy to "work around" or completely ignore OO features and treat the language like C. In Java there are good opportunities for motivating the discussion of object orien-tation.
