I have a John Deere L118 Limited Edition (w/ 20 HP B&S engine), which I purchased about 8 years ago. It ran well with few problems up to late this summer. I believe the problem started when I accidentally filled the tank with some stale gasoline - the tractor turned over, but would not start.

So first off, I will address  
the underlying issue I was  
having with my L118. Plain  
and simple, it was hard to  
steer. However with 404  
hours on it, I can  
understand why the major  
steering components would  
need replaced, especially  
since we are talking about  
an L series Deere.
