In addition, many exercise physiologists study the effect of exercise on pathology, and the mechanisms by which exercise can reduce or reverse disease progression. While you don't want to exercise immediately after eating a large meal, eating about 2 hours before exercise can help fuel your exercise and help you avoid bonking

during your workout.

Physiology

Exercise Physiology is the physiology of physical exercise, concerned with the way our body responds to exercise and training. It addresses the short term biological responses to the stress of physical activity and studies the acute responses and chronic adaptations to a wide range of exercise conditions.
